

How to Make a Resume for Any Job in 2026

Cited from: <https://resumegenius.com/blog/resume-help/how-to-write-a-resume>

A resume is a job application document that summarizes your skills and experience. It's the most important document you submit when you apply for a job.

In my role as a career coach and resume expert, I've spent the past five years helping people improve their resumes and I've reviewed hundreds along the way. I've seen what works — and what doesn't — and I know what the employer will be looking for when they open your application.

In this guide, I'll walk you through my writing process. You'll learn how to build a professional resume at any stage of your career by using an approach grounded in your skills and career goals — not generic formatting advice.

You can use this guide to write a resume for 99% of jobs on the market. You should lay out your skills and experience using a CV template if you're pursuing a career in academia.

For every other position, whether you're applying for your first job or putting together a resume for a managerial role, this guide will give you a strong foundation for writing a successful resume.

1. Match your skills to the job requirements

The secret to a successful resume is to address the employer's needs. The easiest way to make that connection is by matching your skills and experience to the job description.

When you do this, your most relevant qualifications naturally move to the front.

Begin by listing the key tasks and required skills from the job description. Include anything the employer highlights as a core expectation — particularly anything bulleted under “Key requirements” or “Main responsibilities.”

For example, from the Digital Marketing Associate role below, you could pull out every point listed under “What You'll Do.”

Job description:

Digital Marketing Associate

Content Locker

As a Digital Marketing Associate, you'll play a key role in developing client campaigns, with a focus on web content, social media, and performance reporting. This is an ideal role for someone eager to learn agency-side marketing and build hands-on experience.

What You'll Do

Assist with campaign planning and strategy.

Create engaging content for Instagram, LinkedIn, TikTok, and blogs.

Monitor campaign performance and prepare monthly analytics reports.

Once you have the employer's requirements listed, line up any relevant achievements from your work, studies, or personal projects.

Try to include a clear measure of success wherever you can (e.g., “increased followers by 30%”). These details will help you write stronger bullet points later.

Using a simple table makes it easier to connect your skills to the job requirements.

Responsibility	Skill/Achievement	Measure of Success
<i>List daily tasks & main responsibilities as listed in the job description</i>	<i>Line up any relevant qualifications from your professional or academic background</i>	<i>Note any specific awards, grades, or metrics that give context to your success</i>
<i>Assist with campaign planning</i>	<i>Led a successful campaign for a student startup competition</i>	<i>Received student award (Holt Prize)</i>
<i>Create social media content</i>	<i>Freelanced as social media content creator on Fiverr</i>	<i>Great client followers by 30% in 6 months</i>
<i>Prepare analytics reports</i>	<i>Solid understanding of Google Analytics</i>	<i>Completed GA4 Certification</i>

Keep adding to your table until you’ve mapped all your relevant skills to the role. This becomes the foundation of your resume, and you’ll refer back to it as you write each section.

2. Choose the right template

Pick a resume template that displays information cleanly and simply.

It uses a widely recognized resume format, with clear headings, neat spacing, and a professional color scheme.

When choosing a resume template, prioritize simplicity and professionalism.

The design you pick should neatly fit all essential information on one page — the appropriate resume length for most job applicants.

Avoid template designs with complex graphics and images because these features cause errors in recruitment software.

3. Write your resume summary

A resume summary is a short, 2–3 sentence statement at the top of your resume that outlines your strongest skills and most relevant achievements for the job you’re applying for.

Don’t write a general overview of your professional background. Instead, focus on what makes you a good fit for the job.

Here’s a simple template you can use to write your resume summary:

Resume summary template

[Job Title] with [# years of experience/a solid foundation] in [relevant industry]. Skilled in [skill 1], [skill 2], and [skill 3], with a strong track record of [measurable achievement, e.g., “delivering successful email marketing campaigns”]. Looking to apply my expertise to help

[Company Name] [goal or outcome, e.g., “improve customer engagement and drive growth”].

A short, results-focused summary helps you stand out immediately in any field. You can also highlight your professional values or long-term goals if doing so strengthens your alignment with the employer.

4. Lay out your relevant experience

The best way to list your relevant experience is in reverse chronological order — start with your most recent job and work backward.

Here’s how to structure each entry:

Work experience template

Job Title – Dates employed [month and year]

Company name – Company location [city and state]

Three to five bullet points describing your achievements and responsibilities

Include hard numbers when possible

Start each bullet point with an action verb

If you’ve been promoted, list each role separately to emphasize your career growth and success in previous roles:

Work experience section

Technical Support Team Lead

May 20XX – Present | Seattle Community Center | Seattle, WA

Led a small support team, assigning daily tasks and monitoring service queue progress

Trained new volunteers on troubleshooting steps and customer service best practices

Oversaw complex repairs for community members

Technical Support Assistant

June 20XX – August 20XX | Tech Solutions Inc. | Seattle, WA

Provided first-line technical support to customers via phone, email, and chat

Resolved hardware and software issues, reducing average response time by 20%

Assisted in setting up and maintaining IT systems for office and remote employees

Don’t worry about career gaps — more people have them than you think. It’s easy to explain a gap in your cover letter, and you should only consider doing so if you stopped working for more than six months.

What to do if you don’t have work experience yet

List any experience you have the same way you would for a full-time job.

Relevant experience could be any of the following:

- Independent projects
- Coursework
- Volunteer work
- Extracurricular activities
- Internships

If you genuinely have very little hands-on experience you can add, focus on your skills by writing a functional resume.

Functional resumes follow a unique skills-focused structure that emphasizes what you know rather than what you've done. This layout is a good solution if you have less than six months of relevant experience. Otherwise, stick to the standard chronological resume format laid out in this guide.

How to write your bullet points

Focus on achievements rather than responsibilities. Start each bullet with an action verb and name the tools and methods you used. Include the impact of your work where possible.

Quantify your achievements wherever possible — but don't force in a hard number for the sake of it. Hard numbers are only meaningful when your work can be easily measured:

Assisted 50 customers daily with purchases and returns

Implemented a content plan for Instagram that increased followers by 15,000 in two months

Remember that your bullet points are an opportunity to tailor your job to the target role, so choose accomplishments that reflect the job's skill requirements. The example below shows how different achievements can reflect different strengths.

Experience bullet point

Provided personalized shopping assistance to 40+ customers per day

What it highlights

Customer service

Organized inventory with high efficiency, completing tasks 10% faster than the team average

Attention to detail

Achieved an average of 140% of sales goals for three consecutive months.

Sales performance

Maintain attractive merchandise displays, maximizing purchases through strategic product placement

Marketing skills, customer-focus

5. Outline your education

If you already have a few years work experience, your education section should be brief and focused. It should list your highest level of education, whether that's a post graduate degree,

college degree, or high school diploma.

Many jobs have formal education requirements, and employers often use applicant tracking systems (ATS) to filter resumes by education level, so including this detail is vital.

Here's how to format an education entry:

Education section template

Degree name

School name and location – Graduation year

GPA (if above 3.5)

Latin honors

You should add more detail to your education section if you are still studying or have less than two years of relevant experience.

For example, you could consider including relevant coursework or academic achievements and honors.

As with every part of your resume, be selective and include only what strengthens your application — especially if you already have work experience.

Do

List your most recent qualification first. Work backward from your latest degree or certification

Include key details: institution, qualification, subject, and completion year

Add honors, awards, or relevant coursework if they strengthen your application

Keep entries relevant to your target role

Group similar qualifications (e.g., “Professional Certifications” or “Postgraduate Studies”) to avoid clutter

Don't

Include GPA unless requested or highly impressive

List every course you've taken. Focus on the most relevant or advanced ones

Mention high school once you have a college degree or higher

Exaggerate qualifications

Duplicate entries. If you earned multiple credentials from the same provider, combine them clearly

6. List your skills

A good skills section shows the employer exactly what you specialize in. Keep it concise. A short bulleted list of up to 10 skills is ideal.

These skills should highlight your relevant expertise and help you stand out from other qualified candidates.

If you've researched the role and identified your unique selling point, you should already

have a good sense of what to include here.

Here are some good types of skills to highlight in your skills section:

Tools and software (e.g., Python, Adobe Photoshop)

Industry or market knowledge (e.g., social media marketing)

Certifications or licenses (if you haven't included a separate certifications section)

Only put hard skills in your skills section

Your skills list should make sense to the employer at a glance. Some resume skills appear too vague when listed alone.

Before adding any skill to this part of your resume, ask yourself — “Could any candidate claim they have this knowledge?”

If the answer is yes, you need to list a more specific term — or show the skill through examples in your experience section.

How to List Skills on Your Resume

Don't write...

Communication skills

Analytical skills

Teamwork

People skills

Write...

Public speaking, presentation skills, data visualization

Market trend analysis, root-cause analysis, A/B testing

Project coordination, mentoring

Community engagement, customer support, frontline customer service

7. Optimize your resume for HR software

For your resume to be competitive, it needs to be machine-readable and keyword-optimized, then your resume will scan easily into HR software.

It's also that your resume uses accurate keywords. Keyword-optimized resumes are more likely to score highly on an ATS — and employers are more likely to prioritize high-scoring resumes when reviewing applications manually.

8. Check your work

Before you submit your resume, give your writing a final quality check. Mistakes are easy to miss — especially when you've been working on the same document for a long time.

You can use this checklist to review your resume manually:

The Resume Checklist

Email address is professional – for example, firstname.lastname@email.com

No headshots or sensitive personal details included

Fits on one page (or two pages if you're experienced)

Easy to read – appropriate font, size 10–12 pt, clear spacing

Design is appropriate for the position you're applying for

Includes essential resume sections (e.g., experience, education, skills)

Quantifies achievements with numbers in the work experience section

Uses action verbs throughout

Addresses the requirements listed in the job ad

No typos or grammatical errors

Clear formatting with appropriate spacing and logical structure

Double check your summary and work experience section. You'll have edited these sections heavily at this point — errors can easily creep in when you're focusing on including the right keywords and highlighting your impact.

Common Resume Writing Mistakes

<i>Mistakes</i>	<i>Don't Write</i>	<i>Do Write</i>
<i>Using personal pronouns</i>	<i>I trained...</i>	<i>Trained...</i>
<i>Forgetting apostrophes</i>	<i>5+ years experience</i>	<i>5+ years' experience</i>
<i>Relying on weak verbs</i>	<i>Did (tasks)</i>	<i>Performed, carried out, executed</i>
<i>Being unclear about the results of your actions</i>	<i>Increased software efficiency by 30%</i>	<i>Reduced software load times by 30%</i>
<i>Bragging and complaining</i>	<i>Overcame inefficient management to...</i>	<i>Succeeded in...</i>
<i>Not showing initiative</i>	<i>Was in charge of</i>	<i>Managed, oversaw, supervised</i>

Vocabulary

序	英文词汇 (词性)	中文释义	英文例句
1	achievement (n.)	成就; 业绩	The candidate's greatest achievement was turning around a failing supply chain, saving the company millions.
2	alignment (n.)	结盟; 一致	Ensuring alignment between departmental goals and the corporate strategy is a key task for any CEO.
3	bullet point (n.)	项目符号要点	Resumes cluttered with dense paragraphs are less effective than those using crisp bullet points to highlight achievements.
4	certification (n.)	认证; 证书	Professional certification in project management can significantly enhance an applicant's marketability.
5	chronological (adj.)	按时间顺序的	A chronological resume, which lists work history in reverse order, remains the preferred format for most recruiters.
6	customize (v.)	定制; 定做	In a competitive job market, it is essential to customize your resume for each specific role rather than sending a generic version.
7	differentiate (v.)	区分; 使有差别	A unique value proposition in your professional summary helps to differentiate you from a sea of similarly qualified candidates.
8	entry-level (adj.)	入门级的; 初级的	Many entry-level positions now require applicants to have completed at least one internship.
9	gatekeeper (n.)	守门人; 把关者	In modern recruitment, the applicant tracking system acts as the first digital gatekeeper, filtering out unqualified resumes.
10	internship (n.)	实习	A summer internship at a top investment bank can often serve as a fast track to a full-time job offer.
11	optimize (v.)	优化	Job seekers must now optimize their resumes for a two-tiered audience: the hiring manager and the AI software.
12	parsing (n.)	解析; 语法分析	Applicant tracking systems rely on parsing technology to extract information like your name, work history, and skills.

序	英文词汇 (词性)	中文释义	英文例句
13	quantifiable (adj.)	可量化的	Whenever possible, use quantifiable results, such as "increased sales by 20%," to demonstrate your impact.
14	recruitment (n.)	招聘	The recruitment landscape has been transformed by AI, which can now screen thousands of applications in seconds.
15	streamline (v.)	使简化; 使有效率	Many firms use applicant tracking systems to streamline the hiring process and manage the high volume of applicants.
16	tailor (v.)	专门制作; 定制	To stand out, you must tailor your application materials to reflect the specific language and needs of the employer.
17	template (n.)	模板	While using a resume template can save time, it's crucial to modify it so your application doesn't look generic.
18	track record (n.)	业绩记录; 过往记录	The new CFO was hired based on her impressive track record of guiding companies through successful mergers.
19	transferable (adj.)	可转移的; 可通用的	Leadership and problem-solving are highly transferable skills that are valued in almost every industry.
20	vacancy (n.)	空缺; 空职	The company has struggled to fill the vacancy for a senior data scientist due to a highly competitive job market.

Exercise:

Part I Complete the following paragraph with the most suitable words from the box.

applicant, format, keywords, optimize, quantifiable, summary, template

Writing a resume in 2026 requires a strategic approach. After analyzing the job description, you should begin with a strong professional (1) _____ that acts as your elevator pitch. It is crucial to include relevant (2) _____ from the job ad to pass the initial digital screening. When describing your past roles, use (3) _____ achievements, such as "increased efficiency by 15%," to prove your value. Finally, pay close attention to the document's (4) _____; avoid complex graphics and use a clean, standard layout to ensure it is machine-readable. By taking these steps, an (5) _____ can significantly improve their chances of getting an interview.

Part II Choose the best synonym for the underlined word in each sentence.

1. Many large corporations use sophisticated software to streamline the initial stages of recruitment, allowing them to process thousands of applications efficiently.

- A. complicate
- B. delay
- C. simplify
- D. ignore

2. Most recruiters still prefer a chronological resume format, as it provides a clear and straightforward history of an applicant's career progression.

- A. functional
- B. creative
- C. sequential
- D. concise

3. The hiring manager was impressed by the candidate's proven track record of successfully launching new products in competitive markets.

- A. failure
- B. history of performance
- C. academic degree
- D. personal interests

4. For students, a summer internship at a reputable firm can provide invaluable hands-on experience and often leads to a permanent job offer upon graduation.

- A. lecture
- B. traineeship
- C. exam
- D. vacation

5. As a fresher, you can strengthen your application by including relevant coursework, academic projects, and volunteer work to demonstrate your initiative.

- A. an experienced manager
- B. a recent graduate
- C. a career changer
- D. a senior expert

Part III Translate the following paragraph into English, using the words or expressions given.

一份优秀的简历需要为每个职位量身定制。对于应届生来说，应将教育经历和实习经历放在显眼位置，通常按倒序时间排列。在描述这些经历时，建议使用清晰的项目符号来列出你的职责。此外，提及相关的专业认证也能增加你的竞争力。(internship, tailor, reverse chronological, bullet points, certification)

Part IV Discussion Questions

1. The article stresses the importance of "matching your skills to the job requirements." Why is this the "secret to a successful resume"?
2. The guide recommends using a functional resume for those with less experience. In what other situations might a non-traditional resume format be more effective?
3. The author advises focusing on "achievements rather than responsibilities" in your bullet points. Why is this distinction so critical?
4. The article mentions that your resume must be "machine-readable." What are the potential consequences for a job seeker if their resume is not optimized for an Applicant Tracking System (ATS)?
5. The final step is to "check your work" for mistakes. Beyond just avoiding typos, what deeper professional qualities does a well-proofread document communicate to an employer?

How to Write a Cover Letter for a Job in 2026

Cited

from:

https://resumegenius.com/blog/cover-letter-help/how-to-write-a-cover-letter?utm_source=Word_Doc&utm_medium=Cover_Letter_Guide_Link&utm_campaign=RG_Downloads

A recent survey found that 83% of hiring managers read your cover letter and use it to decide whether or not to interview you. As a hiring manager with half a decade of experience, I can tell you I do the same thing.

Writing a cover letter that shows you're a strong candidate and worth interviewing is a skill. I'll show you how to sharpen that skill, so you can spend less time applying for jobs and more time getting paid.

Key takeaways

Writing a good cover letter can significantly boost your chances of getting called in for an interview.

The key to writing an effective cover letter is to customize it for the company and role you're applying for, and tie your experience directly to the requirements in the job ad.

Opening your cover letter with a strong hook can help you stand out.

Don't use your cover letter to rehash your resume or tell your life story.

Writing a cover letter that earns you interviews:

To write a cover letter that truly stands out, start by understanding what the company wants and how you can meet those needs.

1. Research the company and role

You'd be shocked by how many cover letters job seekers submit that don't target a specific company or role.

Learn what the employer is looking for and address these details in your cover letter, and you'll already place yourself above the majority of candidates. Just quickly check out their social media accounts and company website and you'll soon have some ideas.

Write down anything that seems particularly relevant, and then (this part is crucial) think about how your experience, background, and skills align with the company's needs. This approach will help you write a cover letter that's both well-targeted and relevant.

2. Personalize your letter by addressing the hiring manager by name

Personalizing your letter shows you aren't just blasting out cover letters to hundreds of hiring managers. Whenever possible, address your cover letter to the hiring manager by name (i.e. "Dear Mr. Wilson"). This personal touch shows that you've done your research and are genuinely interested in the position.

If you can't find the hiring manager's name, use a professional cover letter salutation such as "Dear Hiring Manager" or "Dear [Department Name] Team."

However, I recommend that you avoid outdated greetings like "To Whom It May Concern" or "Dear Sir or Madam," because these can make your letter feel old-fashioned.

3. Hook your reader with a strong opening paragraph

You don't need to do anything groundbreaking here, just start your cover letter by expressing your enthusiasm for the position and the company.

Briefly mention how you learned about the job opening and provide an overview of your experience. You can also use this paragraph to highlight a key achievement or skill that makes you the ideal candidate.

4. Relate your experience to the job description

Your body paragraphs should convince the hiring manager that you're the perfect person for the job. This is where your previous research comes in handy.

Use this opportunity to market yourself by discussing how your work experience, skills, achievements, and enthusiasm make you a perfect fit for the role as advertised.

One of the most effective ways to do this is to focus on skills and experience that the employer emphasized in the job description. Summarize your most relevant qualifications in one or two sentences, highlighting key achievements or previous responsibilities to make your expertise more compelling.

5. Highlight concrete examples of your achievements

In the next paragraph(s), share concrete examples of your accomplishments and explain how they tie into the role you're applying for. This helps highlight what you're capable of achieving for the business should they hire you.

Focus on details like:

Daily tasks

Time spent on tasks

People you work with

Customer or manager feedback

Project deadlines

Quality metrics

Speed improvements

Most importantly, provide hard numbers for any accomplishments you highlight on your cover letter, similar to how you might quantify your resume.

6. Re-state your interest and finish with confidence

When ending your cover letter, be polite and confident, and continue to market yourself as the best candidate for the job.

Start by sharing your excitement about the opportunity once more — it's always good to end on a positive note! Then, invite the hiring manager to schedule an interview and thank them for taking the time to read your application.

Finally, wrap up your cover letter with a professional sign-off. The standard closing is "Sincerely," but here are some more options:

Cover letter closings

Best wishes,

Cordially,

Respectfully,

Kind regards,

Best regards,

Then, add two line breaks and type your full name.

7. Proofread carefully

Your cover letter doesn't just highlight your work experience – it's also a demonstration of your writing skills and attention to detail. Typos and grammatical errors in your cover letter can easily leave a negative impression on employers.

Here are two quick tricks professional editors use to catch mistakes:

Read your writing out loud: Reading your letter aloud forces you to consider every word, sentence, paragraph, and punctuation mark. Plus, it'll help you notice any hard-to-read sentences, so you can simplify them.

Change the font: Switching your cover letter's font forces your brain to pay attention to mistakes you may have glossed over before.

Check your formatting

Using a consistent cover letter format makes your application look polished and professional.

A well-written cover letter is normally:

200–400 words

Single-spaced

US Letter (USA) or A4 (elsewhere) page size

Left-aligned (except for your name and contact details, which can be centered)

Three mistakes to avoid when writing your cover letter:

As a hiring manager, I've almost never decided to hire someone based solely on their cover letter. However, I have rejected candidates based on their cover letters.

That might sound harsh, but a particularly bad cover letter can raise red flags that a candidate's resume might not reveal.

To help you dodge this fate, here are a few cover letter mistakes you need to avoid making:

1. Rehashing your resume

Your cover letter shouldn't be a narrative version of your resume. Instead, it should tell the stories behind your biggest achievements and explain why you're a great fit for this specific role.

To make the most of your cover letter, choose a couple of your most relevant accomplishments and dig into the details. This helps provide context for your resume, rather than just restating it.

2. Telling your life story

This is the most common mistake I see people make when writing a cover letter, especially from younger candidates who may not have work experience.

Your cover letter isn't an admissions or scholarship essay. Avoid personal details or any emotional appeals to employers.

Instead, focus solely on why you're qualified to do the job – this is all employers are interested in reading.

3. Apologizing or underselling yourself

This is another mistake I see younger job seekers and people changing careers make all the time. If you don't meet all the requirements for a job, don't apologize or draw attention to what you're missing.

People admire confidence, and that includes employers. Instead of bringing attention to your weaknesses, focus on your transferable skills and eagerness to learn.

In particular, avoid self-deprecating language or excessive humility, because this can make you look unsure of yourself and distract from your qualifications.

Instead, focus on explaining why the role excites you and how your skills align with their needs, rather than overemphasizing how much you need the position.

Vocabulary

序	英文词汇 (词性)	中文释义	英文例句
1	applicant (n.)	申请人	The ideal applicant will possess not only a stellar academic record but also proven leadership skills.
2	application (n.)	申请(书)	His application for the managerial role was meticulously crafted, highlighting his decade of industry experience.
3	collaborative (adj.)	合作的, 协作的	A collaborative approach between departments is essential for fostering innovation in today's multinational corporations.
4	commitment (n.)	承诺; 投入	The company's long-term commitment to R&D has solidified its position as a market leader.
5	competency (n.)	能力; 胜任	Core competencies such as strategic thinking are increasingly valued over mere technical proficiency.
6	constructive (adj.)	建设性的, 有助益的	The board engaged in a constructive dialogue regarding the firm's future expansion plans.
7	differentiate (v.)	区分; 使有差别	To succeed, a startup must differentiate its product from the multitude of competitors in the market.
8	initiative (n.)	倡议; 主动性	The new environmental initiative was praised for its ambitious targets to reduce carbon emissions.
9	interpersonal (adj.)	人际的	Strong interpersonal skills are a prerequisite for roles that require extensive client interaction.
10	justify (v.)	证明.....有理; 为.....辩护	The firm struggled to justify its exorbitant fees to clients after a year of mediocre returns.
11	negotiation (n.)	谈判; 协商	The marathon negotiation session finally concluded with a mutually beneficial trade agreement.
12	networking (n.)	建立人脉	Effective networking can often unlock opportunities that are never formally advertised.

序	英文词汇 (词性)	中文释义	英文例句
13	onboarding (n.)	入职; 岗前培训	The company's structured onboarding program helps new hires integrate seamlessly into the corporate culture.
14	proactive (adj.)	积极主动的; 先发制人的	A proactive approach to risk management can save corporations millions in potential losses.
15	recruitment (n.)	招聘	The recruitment drive aims to attract top-tier talent from universities across the nation.
16	referee (n.)	推荐人; 裁判	He listed his former professor as a referee to attest to his academic abilities.
17	tailor (v.)	专门制作; 定制	Successful candidates always tailor their cover letters to address the specific requirements of the job description.
18	transferable (adj.)	可转移的; 可通用的	Leadership and communication are highly transferable skills that are valuable in any industry.
19	transparent (adj.)	透明的; 坦率的	The company maintains a transparent communication policy to keep all stakeholders informed.
20	workload (n.)	工作量; 工作负担	Managers must ensure an even distribution of the workload to prevent employee burnout.

Exercise:

Part I Complete the following paragraph with the most suitable words from the box.

applicant, competencies, differentiate, proactive, qualified, referee, tailor

Preparing for a successful job interview requires more than just showing up. A smart job-seeker will carefully study the job description to understand the specific (1) _____ the employer is looking for. It's crucial to (2) _____ your answers to highlight how your unique experience aligns with the company's needs. By doing this, you (3) _____ yourself from other candidates who give generic responses. A truly impressive (4) _____ takes a (5) _____ approach, preparing thoughtful questions to ask the interviewer, which demonstrates genuine interest and engagement.

Part II Choose the best synonym for the underlined word in each sentence.

1. A successful manager should be proactive in anticipating market trends.
 - A. reactive
 - B. passive
 - C. active
 - D. cautious
2. The company values its employees' commitment to continuous improvement.
 - A. hesitation
 - B. dedication
 - C. refusal
 - D. indifference
3. The company's human resources department is launching a new initiative to improve employee well-being and mental health.
 - A. scheme
 - B. problem
 - C. product
 - D. meeting
4. The new manager's open-door policy fosters a more transparent and trusting relationship with her team.
 - A. secret
 - B. confusing
 - C. expensive
 - D. candid
5. In a globalized economy, the ability to work in a collaborative international team is a highly prized asset.
 - A. competitive
 - B. cooperative
 - C. independent
 - D. solitary

Part III Translate the following paragraph into English, using the words or expressions given.

一份精心准备的求职申请不仅仅是列出工作经历。在当今多元化的劳动力市场中，面试官希望评估你的软技能，尤其是人际交往能力。讨论你过往经历时，要清晰地展示你的核心优势，并表达你对这个行业真正的热忱与投入。这样的应聘者总能给人留下最深刻的印象。
(application, commitment, interpersonal, strengths, workforce)

Part IV Discussion Questions

1. The article emphasizes tailoring your cover letter. Why is a generic, one-size-fits-all approach so ineffective in today's job market?
2. The author advises using a "strong hook" in your opening paragraph. In what other professional situations is it important to grab your audience's attention immediately?
3. Discuss the importance of providing "hard numbers" or concrete examples of your achievements. Why is this more persuasive than simply listing your duties?
4. The passage warns against "apologizing or underselling yourself." Why might candidates, especially freshers, fall into this trap, and how can they avoid it?
5. The author mentions that proofreading demonstrates attention to detail. Can you think of a time in a professional or academic setting where a small error had a big negative impact?
