

populous state in the United States and the third largest by area. Los Angeles is California's most populous city. California is considered the origin of the American film industry, the Internet, and the personal computer.

#### 10. Nevada

Nevada is a state in the western and southwestern regions of the United States. Nevada is officially known as the "Silver State" because of the importance of silver to its history and economy.

Unit 7

## IV Keys to exercises

### Lead-in

(Answers may vary.)

### Part 1 Listening

#### Listening 1 *Climate Change Is Happening (Section I)*

1. 1) cut    2) emissions    3) less of    4) ignore    5) more powerful

2. 1) All of us. (Everybody.)
- 2) Actions, choices and behaviors.
- 3) A profound but negative impact.

#### Listening 2 *Climate Change Is Happening (Section II)*

1. 1) good    2) disruptive    3) upset    4) cost    5) some deaths    6) poor
- 7) not    8) support    9) devastating    10) loss of home    11) amounts of death
2. 1) Avoiding a two-degree centigrade warming.
- 2) Dangerous climate change. / Dangerous impacts on humans and the environment.

### Part 2 Viewing

#### Viewing 1 *What Can You Do Right Now to Save the Earth?*

1. 1) c    2) a    3) c    4) b
2. 1) T    2) T    3) F    4) F    5) T
3. 1) Talk to    2) Organize    3) Contact; take action; policies

### Academic Listening Skill

- 1) The expression “believe it or not” shows an affirmative attitude; the adjective “huge” shows that a diet can make an extremely big change.
- 2) The exclamatory sentence shows encouragement, implying that everyone can do simple things to make a difference.
- 3) The exclamatory sentence shows encouragement, motivating the audience to try more plant-based meals.
- 4) The exaggerated words “lose your world” implies the serious consequence.
- 5) The words “stakes” and “never” indicate a severe situation like we are gambling all our lives on it.

### Critical Thinking

1. (Answers may vary.) Here's a list of ongoing changes that climate scientists have concluded are likely linked to global warming.
  - **Higher temperatures.** Every continent has warmed substantially since the 1950s. There are more hot days and fewer cold days, on average, and the hot days are hotter.
  - **Heavier storms.** The world's atmosphere can hold more moisture as it warms. As a result, the overall number of heavier storms has likely increased since midcentury, particularly in North America and Europe.
  - **Shrinking glaciers.** Glaciers around the world have, on average, been losing ice since the 1970s. In some areas, that is reducing the amount of available freshwater.
  - **Sea-level rise.** Global sea levels rose 25 centimeters (9.8 inches) in the 19th and 20th centuries, after 2,000 years of relatively little change. The pace of sea-level rise has continued to increase in recent decades.
  - **Food supply.** A hotter climate can be both good for crops — it lengthens the growing season, and more carbon dioxide can increase photosynthesis (光合作用) — and bad for crops — excess heat can damage plants.
  - **Shifting species.** Many land and marine species have had to shift their geographic ranges in response to warmer temperatures.
2. (Answers may vary.) When asking the government to take measures toward a more sustainable life, you may consider these things they can do: promoting renewable energy; encouraging the use of bicycles and other non-polluting transportation methods in the city; correctly managing waste through recycling / reuse; regulating properly labelling products (e.g. labels that specify product origins, whether or not they are transgenic); encouraging technological innovation of protecting environment, and so on.

## Viewing 2 *Seven Tips on How to Survive Natural Disasters*

1. 1) T    2) F    3) F    4) T    5) T    6) T
2. 1) Earthquakes and underwater landslides.  
2) Escape to a higher lying area.  
3) Intense rainfalls.  
4) Move in the water, swimming on your back.  
5) Move to the side of the slope as fast as you can.  
6) When you hear the rescue team close to you.
3. 1) breathe    2) cover    3) escape    4) hide    5) drop  
6) cover    7) hold on    8) run out of    9) inform    10) get ready for  
11) survival kit    12) supplies    13) 72

### Academic Listening Skill

- 1) Not mentioned.
- 2) Not mentioned.
- 3) Earthquakes and underwater landslides.
- 4) Intense rainfalls (which can be long or even very short).
- 5) Not mentioned.
- 6) Both natural and man-made.
- 7) Not mentioned.

### Critical Thinking

1. (Answers may vary.) Staying calm is the most important thing a person can do during any emergency. Of course, this is easier said than done in a scary situation. A little fear is a natural response to a frightening event. But when fear runs unrestricted (this state is commonly known as panic), a person may make irrational, dangerous, or even deadly choices. Staying calm and preventing panic should be a priority for each person during a crisis.
2. (Answers may vary.)

## Part 3 Speaking

### Communicating Skill

1. (Answers may vary.) The questions made from the prompts may be:
  - 1) Where do you plan to go this weekend?
  - 2) What do you want to buy recently?

- 3) Which movies are you going to watch this month?
  - 4) Which books would you like to read this year?
  - 5) Which cities or countries would you prefer to visit this year?
2. (Answers may vary.)

### Academic Speaking Skill

1. 1) c    2) b    3) e    4) a    5) d

2. (Answers may vary.)

## V Listening and viewing scripts

### Part 1 Listening

#### Listening 1 *Climate Change Is Happening (Section I)*

##### 7.1

Over our lifetimes, we've all contributed to climate change. Actions, choices and behaviors will have led to an increase in greenhouse gas emissions. And I think that that's quite a powerful thought. But it does have the potential to make us feel guilty when we think about decisions we might have made around where to travel to, how often and how, about the energy that we choose to use in our homes or in our workplaces, or quite simply the lifestyles that we lead and enjoy. But we can also turn that thought on its head, and think that if we've had such a profound but a negative impact on our climate already, then we have an opportunity to influence the amount of future climate change that we will need to adapt to.

So we have a choice. We can either choose to start to take climate change seriously, and significantly cut and mitigate our greenhouse gas emissions, and then we will have to adapt to less of the climate change impacts in future. Alternatively, we can continue to really ignore the climate change problem. But if we do that, we are also choosing to adapt to very much more powerful climate impacts in future. And not only that. As people who live in countries with high per capita emissions, we're making that choice on behalf of others as well. But the choice that we don't have is a no climate change future.

#### Listening 2 *Climate Change Is Happening (Section II)*

##### 7.2

Over the last two decades, our government negotiators and policymakers have been coming together to discuss climate change, and they've been focused on avoiding a two-degree

# Unit 8

## Part 1 Listening

### Listening 1 *Keep Your Goals to Yourself (Section I)*

1. 1) kept your mouth shut  
2) less likely  
3) acknowledge  
4) tricked into  
5) less motivated
2. 1) Social reality.  
2) We should tell our friends.

### Listening 2 *Keep Your Goals to Yourself (Section II)*

1. 1) 1926                      2) 1933                      3) 1982                      4) 2009                      5) 163  
6) personal goal          7) 45                          8) stop                      9) commitment          10) 45  
11) 33                      12) a long way to go      13) much closer to
2. 1) resist                  2) delay                      3) mistakes                  4) no satisfaction

## Part 2 Viewing

### Viewing 1 *Grit — the Power of Passion and Perseverance*

1. 1) b                  2) b                  3) a                  4) a
2. 1) Who is successful here and why  
2) Kids and adults  
3) West Point  
4) Spelling Bee  
5) rookie teachers  
6) private companies  
7) grit
3. 1) T                  2) F                  3) F                  4) T                  5) T

### Academic Listening Skill

3

### Critical Thinking

1. (Answers may vary.) After studying the behavior of thousands of children, Dr. Dweck at Stanford University coined the terms **fixed mindset** and **growth mindset** to describe the

underlying beliefs people have about learning and intelligence. When students believe they can get smarter, they understand that effort makes them stronger. Therefore they put in extra time and effort, and that leads to higher achievement. In one word, growth mindset means the understanding that abilities and intelligence can be developed. So this theory greatly affects students' attitudes toward learning.

2. (Answers may vary.)

## **Viewing 2** *Daily Habits of Successful People*

1. 1) a 2) c 3) b

2. 1) *Million Dollar Habits.*

2) Develop the habit of daily goal setting and goal orientation.

3) For each day.

4) Be results-oriented.

5) Start immediately and discipline yourself to work non-stop until it's complete.

3. 1) people-oriented 2) cooperation 3) health-oriented 4) less 5) better  
6) exercise 7) honesty 8) self-discipline 9) foundation 10) do it anyway

## **Academic Listening Skill**

- 1) e 2) d 3) b 4) e 5) d 6) a 7) c

## **Critical Thinking**

1. (Answers may vary.) A habit is something we do regularly without consciously thinking much about it. It is an automatic mental and behavioral activity. Habits make it possible for us to do things without spending excessive mental effort. Therefore, habits play an important role in simplifying our lives.

Let's take study habits as an example. Good habits, like planning specific times for studying, or reviewing schoolwork over the weekend, serve to create routine, order and efficiency. Bad habits, like delaying schoolwork until the deadline, or never discussing with classmates, have the opposite effect and can put us into negative or rigid patterns of behavior.

2. (Answers may vary.)

## **Part 3 Speaking**

### **Communicating Skill**

1. 1) c 2) b 3) a 4) b

2. (Answers may vary.)

## Academic Speaking Skill

1. (Answers may vary.)

| Category     | Component                                                                                                                |
|--------------|--------------------------------------------------------------------------------------------------------------------------|
| Content      | The topic / research problem is clearly stated.                                                                          |
|              | All materials / analyses clearly support the primary message.                                                            |
|              | The content is relatively simple for the audience to understand.                                                         |
|              | The given information is sufficient / creative ...                                                                       |
|              | ...                                                                                                                      |
| Organization | Follow the basic structure of introduction-body-conclusion.                                                              |
|              | The transitions of different parts are smooth.                                                                           |
|              | Thoughts and ideas flow in a logical manner.                                                                             |
|              | The body part follows one or more organizational patterns (e.g. cause-effect, problem-solution, chronological sequence). |
|              | ...                                                                                                                      |
| Performance  | Good pronunciation and intonation.                                                                                       |
|              | Eye contact with the audience.                                                                                           |
|              | Fluency.                                                                                                                 |
|              | Suitable volume.                                                                                                         |
|              | Enthusiasm and confidence.                                                                                               |
|              | No reading from the scripts.                                                                                             |
|              | Proper body language.                                                                                                    |
|              | ...                                                                                                                      |
| Visual aids  | Clear, catchy slides, not overcrowded.                                                                                   |
|              | Contribution of colors to understanding, not distracting.                                                                |
|              | Suitable font (i.e. the size and style of words).                                                                        |
|              | Not too many pictures.                                                                                                   |
|              | ...                                                                                                                      |

2. (Answers may vary.)
